-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Upon further consideration, the allowability of claim 17 has been withdrawn.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 16 is rejected under 35 U.S.C. 102(e) as being anticipated by Siegfried 6,247,467.

Siegfried shows a bow string release having a housing 27; trigger lever 26 having a constant travel distance; and a manually adjustable trigger adjustment mechanism 72 (figure 5). The housing has a central axis, and the trigger adjustment mechanism is "substantially" coaxial with the central axis; "substantially" is broad terminology. Note

that there is no structure claimed that would make the location of the adjustment mechanism critical.

Claim 17 is rejected under 35 U.S.C. 102(b) as being anticipated by Bankstahl 5,417,197 (of record).

Bankstahl shows a bow string release including jaws 56; this is the only structure required by the claim; "rotate", "pivot", and "tilt" are functional limitations, but there is no structure claimed to permit these functions. The claim must define over the prior art with structure, not merely function.

Claims 1-14 & 18-22 are allowed.
